Full Stack Web Development
DevMountain - 2019

EXPERIENCE

1/2020 - Present **Vern Software Development** *Full Stack Developer*

Phoenix, AZ
Remote

- Planned applications using wireframe tools.
- Constructed web applications using PERN stack, JavaScript, SASS, and RESTful services in an agile work environment.
- Maintained clean, high-quality code by making it efficient, reusable, and simple.
- Continued to maintain code by ensuring dependencies were up to date.
- Upgraded applications upon request of clients.

9/2019 - 12/2019 **DevMountain** *Full Stack Student Developer*

Phoenix, AZ

Both were built with JavaScript, React, HTML5, SASS, NodeJS, SQL, Postgres, and Express.

Ultimate Pokedex • [theultimatepokedex.xyz](#) • [Github Repo](#)

- Pulled data from the PokeAPI to create a fully functional Pokedex.
- Won award for “Best Project All Around” as decided by DevMountain staff and peers.

Void • [voidkanban.xyz](#) • [Github Repo](#)

- Managed task distribution and successfully worked through Git merge conflicts.
- Focused on making the front end fully functional and responsive.

9/2018 - 8/2019 **Wendy's** *Cashier*

Phoenix, AZ

- Took orders on NCR Point-of-Sale terminal system.
- Maintained composure in a high-volume, fast-paced work environment.
- Handled currency and credit transactions quickly and accurately.
