Devmountain - 2019

## EXPERIENCE

6/2024 -  
8/2024

### Devmountain

Lead Instructor

Phoenix, AZ  
Remote

- Gave React & Web Development lectures 4 times a week with consistent student acclamation.
- Maintained curriculum by testing, rewriting, and ensuring the usability of all assignment material.
- Gave input on and quickly learned any new software implemented into the curriculum.
- Lead large teams of students through morning stand-ups and coding challenges.
- Provided expertise to help students with code construction and technical issues.

12/2021 -  
6/2024

### Devmountain

Teaching Assistant

Phoenix, AZ  
Remote

- Assisted in teaching and maintaining foundational material for the Software Engineering program.
- Collaborated with other educational staff to ensure student success.
- Gave lectures 1-2 times a week with consistent student acclamation.
- Lead small teams of students through morning stand-ups and coding challenges.
- Provided expertise to help students with code construction and technical issues.

1/2020 -  
12/2021

### Vern Software Development

Full-Stack Web Developer

Phoenix, AZ  
Remote

- Developed custom web applications using React, Express, Node, and PostgreSQL with a RESTful API backend.
- Constructed intuitive UI to the client's design specifications using CSS and SASS.
- Followed agile development practices to ensure productivity and client communication.

9/2019 -  
12/2019

### Devmountain Student Developers

Full-Stack Web Developer

Phoenix, AZ

- Created two intuitive React applications in an agile development environment.
- Focused on making reusable components, RESTful endpoints, and clean UI and UX.
- Navigated a professional development team by managing task distribution and working through Git merge conflicts.
- Designed site layout, server structure, and styling independently and in collaboration with other developers.
- Completed daily stand-ups before and after every work day.
