Phoenix, AZ

DevMountain
Full-Stack Developer

Both were built with JavaScript, React, Redux, HTML5, SCSS, NodeJS, SQL, Postgres, and Express.

Ultimate Pokedex • theultimatepokedex.xyz • Github Repo

- Created an online pokedex to provide users with easy access to data from all the games
- Used axios to pull data from the PokeAPI to create a fully functional pokedex
- Designed site layout, server structure, and styling independently
- Won award for "Best Project All Around" as decided by Devmountain staff and peers

Void • voidkanban.xyz • Github Repo

- Created an online task managing site that combines a kanban style task tracker and a live messaging service
- Navigated working in a professional development team by managing task distribution and successfully working through Git merge conflicts
- Completed daily stand-ups before and after every work day
- Focused on making the front end fully functional and responsive across all viewing platforms

9/2018 - 8/2019

Phoenix, AZ

Wendy's
Cashier

- Maintained professionalism by using 80/20 problem solving method in a high-volume, fast-paced work environment
- Utilized an NCR POS terminal using interpersonal communication skills to collect customer data
- Handled currency and credit transactions quickly and accurately.
