EXECUTIVE SUMMARY

Full-Stack Web Developer with five years of expertise in software engineering technologies, recognized for delivering well-crafted code and excelling in rapid problem-solving. Demonstrates strong communication skills and a commitment to developing high-quality applications. Aims to be a vital contributor to a development team by ensuring technical excellence and collaborative success.

EDUCATION & CERTIFICATION

Full-Stack Web Development, Strayer University – Phoenix, AZ

High School Diploma, North Canyon High School – Phoenix, AZ

SKILLS

JavaScript, React, Redux, Node, Express, PostgreSQL, Sequelize, Bootstrap, HTML5, CSS3, SASS, Jest, Selenium, Git, Rollbar, AWS, Heroku, Agile, Instructing, Management

PROFESSIONAL EXPERIENCE

Devmountain | Phoenix, AZ

December 2021 - August 2024

Software Engineering Instructor & Developer

- Maintained and updated 20+ curriculum applications by adding new technologies to existing code, creating new learning materials, and rewriting information based on current best practices.
- Increased student satisfaction to 95% by using Jest and Selenium to ensure functionality of curriculum.
- Taught software engineering concepts and curriculum to 200+ developers with a 99% graduation rate by using mastery of full-stack technologies to thoroughly explain and demonstrate material.
- Lead and managed teams of 5-20 students through each day by initiating daily stand-ups, having weekly 1-on-1 meetings, and providing expertise to help debug code construction and technical issues.
- Consistently achieved a 70+ NPS score over 3 years of instructing and development.

Vern Software Development | Phoenix, AZ

January 2020 - December 2021

Full-Stack Web Developer

- Developed a series of custom web applications on a small team of developers by using known technologies and communication skills to integrate into the existing team and implement code.
- Constructed components reused 5+ times per project by implementing React into the tech stack.
- Made load times up to 20% faster by converting existing code to be more efficient, clean, and reusable.
- Improved SEO of projects up to 30% by ensuring proper metadata and content structure on each page.
- Increased customer satisfaction rate to 95% by following agile development practices.

Devmountain Student Developers | Phoenix, AZ

September 2019 - December 2019

Full-Stack Web Developer

- Created 2 full-stack applications in 7 weeks by using learned technologies, knowledge of agile development practices, and guidance from instructors to meet the project deadlines. One project being individual and the other being a group project with 3 peers.
- Reduced application load times on the solo project by 50% by implementing dynamic RESTful endpoints.
- Managed task distribution and Git merge conflicts with a 98% success rate by maintaining clear communication with peers and properly assigning new implementations during morning scrum meetings.
- Achieved a 100% approval rate on code implementations from collaborating developers by thoroughly planning the site layout, server structure, and styling for the group project.
